

The course

The Shoreline Responder Course is a nationally accredited three day competency based training package designed to provide participants with the skills and knowledge to manage an oil spill response shoreline event.

Students will be taught and assessed on three units of competency:

- Apply health, safety and risk controls when working on oil shorelines (PUAOIL303)
- Apply oil shoreline assessment strategies in an oil spill response (PUAOIL405)
- Lead a team in oiled shoreline clean up (PUAOIL406)

Participants demonstrating competence will be issued a Statement of Attainment.

Course outcomes

Through a selection of theoretical and practical modules and assessments, student will learn and demonstrate competency in:

- Health and safety practices used in an oil environment
- Evaluation and implementation of hazard mitigation systems
- Identification of various shoreline environments and the quantification of oiling
- Development and implementation of plans for shoreline protection and response
- Collecting, evaluating and disseminating information
- Team leadership for shoreline response
- Effective team work

Course duration

The course runs for three days, including practical sessions

Who should attend?

- Oil shoreline responders from Port, State and National Government, Local Councils and Industry
- Commercial operators of vessels, marinas, fish farms and other marine related industries

Course delivery

The course is run by OPEC Systems, Registered Training Organisation No. 41595.

Topics covered

- Oil Spill Response Organisation
- Evaluation Planning and Activation
- Shoreline Assessment
- Shoreline Protection
- Shoreline Clean-up
- Workforce Management
- Site Management
- Waste Management
- Health & Safety
- Communications
- Response Termination

About OPEC College

OPEC Systems is accredited by Australian Skills Quality Authority (ASQA) as a Registered Training Organisation (RTO) within all Australian States. The RTO accreditation allows OPEC to deliver accredited training courses across Australia to a variety of stakeholders and industries.

We established OPEC College in 2019 to demonstrate our increasing commitment to training.

OPEC is the exclusive Australasian agent for some of the world's foremost manufacturers and supplies a range of oil spill equipment including oil spill containment booms, skimmers, decontamination equipment, oil spill storage equipment and oil spill response vessels. OPEC also provides accredited oil spill response training as well as storage and maintenance services of equipment used in oil or chemical spill responses.

RTO No. 41595
